**Re: CERTIFICATION OF PUBLIC NOTICE(s) OF COPPER RETIREMENT
NETWORK CHANGE UNDER RULE 51.332(d) Wireline Competition Bureau
Copper Retirement Network Change Notification filed by Verizon Virginia LLC;
WC Docket No. 16-291 and Report No. NCD-2626**

Dear Ms. Dortch:

Verizon is submitting its certification of public notice of copper retirement network change as required by FCC Rule 51.332(d).

Please contact me should you need any further information.

Sincerely,

A handwritten signature in black ink, appearing to be "Frederick E. Moacdieh", written in a cursive style.

**CERTIFICATION OF PUBLIC NOTICE(s) OF COPPER RETIREMENT
NETWORK CHANGE UNDER RULE 51.332(d)**

**Wireline Competition Bureau Copper Retirement Network Change Notification
filed by Verizon Virginia LLC; WC Docket No. 16-291 and Report No. NCD-2626**

I certify under penalty of perjury that, to the best of my knowledge, information, and belief, the foregoing is true and correct. Executed on December 12, 2016.

1. Identification of Proposed Changes: Retirement of copper distribution and loop facility at some locations in the Occoquan, VA central office;
2. On September 1, 2016, notice was given in compliance with Code of Federal Regulation (CFR) 47, Subsection §51.332(b)(1). On December 9, 2016, Verizon amended its September 1, 2016, to remove thirty-six addresses that had been included erroneously in the original notice. Customers at these locations will not be impacted by this copper retirement filing;
3. On September 1, 2016, Verizon timely served a copy of its notice filed pursuant to CFR §51.332(b)(1) upon each entity within the affected service area that directly interconnects with Verizon's network. On December 9, 2016, Verizon served a copy of its amended notice removing the erroneous addresses upon each entity within the affected service area that directly interconnects with Verizon's network;
4. Attachment A provides the name and address of each entity referred to in paragraph 3, above, upon which Verizon served written notice on September 1, 2016 and on December 9, 2016;
5. On September 1, 2016, Verizon timely notified and submitted a copy of its public notice to the Virginia State Corporation Commission, to Governor Terry McAuliffe, and to the Department of Defense in compliance with CFR §51.332(b)(4). On December 9, 2016, Verizon timely served a copy of its amended notice to the Virginia State Corporation Commission, to Governor Terry McAuliffe, and to the Department of Defense. No Tribal nation will be impacted by this copper retirement;
6. On September 1, 2016, Verizon timely served the customer notice required by CFR §51.332(b)(3) upon all retail customers to whom notice is required. On December 7, 2016, Verizon provided additional notice to retail customers at thirty-six addresses that were included incorrectly in the September 1, 2016 notification; Verizon notified these customers that their addresses had been included in error and that their copper will not be retired at this time;
7. Attachment B contains a copy of the written notices provided to retail customers;
8. Verizon has complied with the requirements of CFR §68.110(b) of this chapter;
9. Verizon has complied with the good faith communication requirements of paragraph CFR §51.332(g) and will continue to do so until implementation of the planned copper retirement is complete; and
10. The docket number and NCD number assigned by the Commission to Verizon's notice provided pursuant to CFR §51.332(b)(1) are WC Docket No. 16-291 and NCD-2626, respectively.

Michael J. White
Executive Director Business Transformation
Verizon

NOTICE OF COPPER RETIREMENT

September 1, 2016

[Redacted]

[Redacted]

Currently, Verizon brings voice and/or data services to your home over copper cables. However, the company is upgrading to fiber-optic technology in your area, and will be retiring its copper facilities that currently serve you and your neighbors.

Our plan is to retire copper facilities in your area on or after March 14, 2017. To continue to provide you service, Verizon will have to move your service to these fiber-optic facilities.

Over the next few months, Verizon will be contacting you to schedule an appointment to have a Verizon technician come to your home and set up your services on fiber. You may also call us at 1.877.439.7442 to schedule an appointment.

We will transfer your voice services from copper to fiber at no cost to you. This transfer will not result in any change to the voice service that you currently receive from Verizon. You may continue to subscribe to the same voice service at the same price, terms, and conditions. In addition, any devices that rely on your voice service, such as fax machines, medical devices, or security alarms connected to a central station, will continue to work in the same way as they currently do over copper. We will also provide you with a battery backup device at no charge. For almost all residential customers, that device uses standard D-cell batteries that can support up to 20 hours of standby voice service during a commercial power outage. In case of a prolonged power outage, you can simply replace the batteries and extend the backup power.

If you subscribe to our High Speed Internet service, the migration to fiber will require a change since that service is not available on our fiber facilities. The Internet access service that we offer on fiber is Fios Internet. Fios Internet is available at significantly faster speeds than High Speed Internet. We will offer the service at a special rate for customers who migrate from copper to fiber facilities as a result of the retirement of our copper facilities. In some cases, this price may be lower or higher than what you currently pay for Internet access.

Please review the Frequently Asked Questions for additional information about the fiber upgrade or visit us at verizon.com/fiberupgrade. If you still have questions, please call us Monday through Friday, 8 a.m. - 8 p.m., or Saturday 9 a.m. - 5 p.m. at 1.877.439.7442.

You may also contact the Federal Communications Commission or your State Commission if you have any questions.

Thank you for continuing to be a loyal customer. We greatly appreciate your business.

Sincerely,

Janet Gazlay Martin

Frequently Asked Questions

- 1. Why fiber optics?** Fiber-optic facilities provide bandwidth to meet today's digital demands and the possibilities of tomorrow. And the quality, performance, and reliability that fiber-optics delivers for voice and other services are far superior to copper.
- 2. I don't want fiber optics. What are my alternatives?** After we retire copper facilities in your area, we will only provide service over fiber-optics. So in order to continue receiving Verizon services, you will have to migrate to our fiber facilities.
- 3. How can I schedule an appointment?** Over the next couple of months, Verizon will contact you to schedule an appointment that is convenient for you. You may also call us at 1.877.439.7442 to schedule an appointment.
- 4. Is the installation process complicated? What equipment is needed in order for me to upgrade to the fiber-optic facilities?** Our goal is to make this as easy as possible. We will provide and install all the required equipment, and use the existing wiring at your home to connect to your phones. We will also provide a backup battery for voice service (see Question #6). Our technician will answer any questions you have and ensure everything is working properly before he or she leaves.
- 5. Will my service or rates change as a result of the fiber upgrade?** Your existing voice service will not change, aside from the added benefit of being delivered over our better quality fiber-optic facilities. High Speed Internet is not available on fiber, but you may choose to have Fios Internet instead. If you choose to purchase Fios Internet, you will be billed accordingly for the service you select.
- 6. What is the backup battery?** We will provide you with a backup battery device at no charge that will power your voice service in the event of a power outage, allowing you to make and receive calls, including to 911, on your corded telephones. For almost all residential customers, we can provide a battery backup device that can provide standby service for up to 20 hours using standard D-cell batteries. In the event of a prolonged power outage, you can simply replace the D-cell batteries for additional backup power. (Cordless phones, alarm equipment, or other devices that require electricity to operate will not be powered by the backup battery device.)
- 7. What if I change providers?** Providers using Verizon's copper facilities have been notified regarding the copper-to-fiber transition and will also be required to migrate to Verizon's fiber-optic facilities. You may transfer (or "port") your number to a new provider.

AVISO DE RETIRADA DEL COBRE

01 de septiembre 2016

[Redacted address block]

[Redacted address block]

En la actualidad, Verizon le presta los servicios de voz o datos que llegan a su hogar a través de cables de cobre. No obstante, la compañía está instalando tecnología de fibra óptica en su zona y esto significa que se retirarán las instalaciones de cobre que les sirven a usted y a sus vecinos.

Nuestro plan es que las instalaciones de cobre ya estén retiradas con fecha de 14 de marzo 2017 o después. Para poder continuar prestandole sus servicios, Verizon tendrá que trasladarlos a las nuevas instalaciones de fibra óptica.

Durante los próximos meses, Verizon se comunicará con usted con el fin de hacer una cita para que un técnico de Verizon le visite y le instale los servicios de fibra. Si lo prefiere, puede llamarnos al teléfono 1.877.439.7442 para hacer la cita.

La transferencia de los servicios de voz de cobre a fibra será gratuita. Esta transferencia no cambiará de ningún modo el servicio de voz que usted recibe de Verizon. Podrá seguir suscrito el mismo servicio de voz al mismo precio y con los mismos términos y condiciones. Además, los dispositivos que dependan del servicio de voz, como pueden ser máquinas de fax, dispositivos médicos o alarmas de seguridad conectadas a una estación central, seguirán funcionando como lo han hecho hasta ahora con las instalaciones de cobre. También le facilitaremos gratis un dispositivo que funcionará como batería de reserva. Para la mayoría de los clientes residenciales, estos dispositivos emplean pilas D-cell, capaces de proporcionar 20 horas de energía al servicio de voz en espera cuando se produce un corte de electricidad. Si el corte dura más de ese tiempo, solo tiene que cambiar las pilas para prolongar la disponibilidad.

Si se suscribe a nuestro servicio de Internet de Alta Velocidad, si habrá un cambio, ya que dicho servicio no se ofrece en las instalaciones de fibra. En su lugar el acceso a Internet se ofrece a través del servicio Internet de Fios. Internet de Fios está disponible a velocidades muy superiores a las que alcanza el Internet de Alta Velocidad. Este servicio estará disponible a un precio especial para los clientes que migren de cobre a fibra como resultado de la retirada de las instalaciones de cobre. En algunos casos, el precio puede ser inferior o superior al que paga ahora por el acceso a Internet.

En la sección de preguntas más frecuentes encontrará más información sobre la actualización con fibra o también puede visitar verizon.com/fiberupgrade. Si sigue teniendo alguna duda, llámenos de lunes a viernes de 8 a.m. a 8 p.m. o los sábados de 9 a.m. a 5 p.m. al 1.877.439.7442.

También puede ponerse en contacto con la Comisión Federal de Comunicaciones o la comisión de su estado si tiene alguna pregunta.

Permítame agradecerle su lealtad como cliente y su confianza.

Atentamente,

Janet Gazlay Martin

Preguntas más frecuentes

1. **¿Por qué la fibra óptica?** Las instalaciones de fibra óptica ofrecen el ancho de banda necesario para responder a las exigencias digitales de hoy y a las posibilidades de mañana. Además, la calidad, rendimiento y confiabilidad que la fibra óptica ofrece para servicios de voz y de otro tipo son muy superiores al cobre.
2. **No quiero fibra óptica. ¿Qué otras alternativas hay?** Una vez retiremos las instalaciones de cobre de su área, solo prestaremos servicio a través de fibra óptica. Por este motivo, si desea seguir recibiendo los servicios de Verizon, deberá migrar a nuestras instalaciones de fibra.
3. **¿Cómo hago la cita?** Durante los dos próximos meses, Verizon se comunicará con usted para hacer una cita en la fecha que le resulte más conveniente. Si lo prefiere, puede llamarnos al teléfono 1.877.439.7442 para hacer la cita.
4. **¿Es complicado el proceso de instalación? ¿Qué equipo necesito para usar las instalaciones de fibra óptica?** Nuestra intención es que este proceso sea lo más sencillo posible. Nosotros le facilitaremos e instalaremos todo el equipo necesario y utilizaremos los cables que ya tiene instalados en su hogar para conectar los teléfonos. También le entregaremos una batería de reserva para el servicio de voz (ver la pregunta 6). Nuestro técnico contestará a sus preguntas y se asegurará de que todo funcione debidamente antes de irse.
5. **¿Cambiará el servicio o los precios debido a la actualización con fibra?** El servicio de voz que tiene ahora no cambiará, excepto que le llegará a través de las instalaciones de fibra óptica que son de calidad superior. El servicio de Internet de Alta Velocidad no se ofrece en las instalaciones de fibra, pero en su lugar puede suscribirse a Internet de Fios. Si decide hacerlo, se le facturará el servicio que elija.
6. **¿Qué es la batería de reserva?** Le facilitaremos de forma gratuita una batería de reserva que suministrará energía a su servicio de voz en caso de que haya un corte de electricidad, para que pueda hacer y recibir llamadas, incluido al 911, desde teléfonos fijos con cable. Para la mayoría de los clientes residenciales, estos dispositivos emplean pilas D-cell, capaces de proporcionar 20 horas de energía al servicio de voz en espera. Si el corte dura más de ese tiempo, solo tiene que cambiar las pilas para prolongar el suministro de reserva. Los teléfonos inalámbricos, los equipos de alarma y cualquier otro dispositivo que necesite electricidad para funcionar no recibirán la alimentación de la batería de reserva.
7. **¿Qué ocurre si cambio de proveedor?** Ya hemos notificado a los proveedores que utilizan las instalaciones de cobre de Verizon sobre la transición de cobre a fibra y también ellos tendrán que migrar a las instalaciones de fibra óptica de Verizon. Si lo desea puede transferir ("port") su número a otro proveedor.

NOTICE OF COPPER RETIREMENT

September 1, 2016

[Redacted]

[Redacted]

[Redacted]

Verizon is upgrading its network to fiber optic technology in the area associated with the above telephone number. Currently, your business location in that area is served on our older copper facilities. Verizon's plan is to migrate customers to its new fiber network and to retire its copper facilities in this area on or after March 14, 2017.

Over the next few months, Verizon will be contacting you to schedule an appointment to have a Verizon technician come to your location and set up your services on fiber. You may also call us at 1.877.505.1185 to schedule an appointment.

We will transfer your dial tone voice service from copper to fiber at no cost to you. This transfer will not result in any change to the dial tone voice service that you currently receive from Verizon. You may continue to subscribe to the same dial tone voice service at the same price, terms, and conditions. In addition, any devices that rely on your dial tone voice service, such as fax machines, payment systems, or security alarms connected to a central station, will continue to work in the same way as they currently do over copper. We will also provide you with a battery backup device at no charge, capable of providing a minimum of 8 hours of standby time in a power outage. Depending on the Verizon equipment installed at your location, backup power may be provided by a 12-volt battery or a device that uses 12 D-cell batteries.

Similarly, if you subscribe to any of our DS1 data services, there will be no change to the price, terms, and conditions when you move these services to our fiber-optic facilities.

If you subscribe to our High Speed Internet service, the migration to fiber will require a change since that service is not available on our fiber facilities. The Internet access service that we offer on fiber is Fios Internet. Fios Internet is available at significantly faster speeds than High Speed Internet. We will offer the service at a special rate for customers who migrate from copper to fiber facilities as a result of the retirement of our copper facilities. In some cases, this price may be lower or higher than what you currently pay for Internet access.

There are some copper-based low bandwidth private line services that will not be available on fiber in the future. Many of them are outdated and may not meet your needs going forward. If you subscribe to one of those services, we will work with you to find a more appropriate service to meet your needs. Low bandwidth private line circuits that are transferred to fiber will have no change in price, terms and conditions.

Please review the Frequently Asked Questions for additional information about the fiber upgrade or visit us at verizon.com/fiberupgrade. If you still have questions, please call us Monday through Friday, 8:30 a.m. – 6:00 p.m. at 1.877.505.1185.

You may also contact the Federal Communications Commission or your State Commission if you have any questions.

Thank you for continuing to be a loyal customer. We greatly appreciate your business.

Sincerely,

Janet Gazlay Martin
